

T-SKID

Manutechnik has more than 35 years of experience in the maintenance sector, and enjoys great prestige worldwide, as well as numerous installations distributed throughout the world.

SKID conveyors

This type of floor conveyor is designed to transport large and heavy parts.

The Skid is driven by a chain that can be placed outside or inside the floor. This chain moves thanks to a rectilinear motor unit, the skid incorporates a mechanism that allows it to be attached to the chain to move.

The structure of the skid is adapted to the needs of the client.

- Layout adapted to the installation.
- High reliability and safety in transport.
- It offers a simple and safe way to transport very heavy parts in the workplace.
- Minimum maintenance and easy to use.

At Manutechnik we have the best professionals who will advise you and help you find the best solution.

Installation prepared to paint crane parts.

SKID conveyor installation.
